DP	NHSC516	SEMINAR	0	0	3	1.5

<b>Course Objective</b>
The course would aim to make students understand the process of doing research.
<b>Learning Outcomes</b>
<p>Upon successful completion of this course, students should:</p> <ul style="list-style-type: none"> <li>• be able to expose themselves to a variety of current seminar topics and an opportunity to evaluate it.</li> <li>• develop skills for literature search and analyzing it</li> <li>• develop skills to formulate research ideas and carry out empirical research</li> <li>• to enhance their writing and research formulation skills</li> <li>• to enhance presentation skills</li> </ul>

Unit No.	Topics to be Covered	Lecture Hours	Learning Outcome
1	<b>Exploratory Review:</b> Undertake a scoping or narrative review of selected area and summarize findings.	8	Student will be able to carry out an academic exploration of the selected area of research
2	<b>In-Depth Review, Finding gaps, Framing arguments:</b> Undertake an extensive/systematic/critical review of a selected area. The review should result in identification of gaps in the area, a methodology to address the gap and potential contribution of the study. The presentation will be similar to a project proposal.	12	Student will be able to carry literature review in depth developing skills of critiquing. Student will also gain familiarity in with project proposals.
3	<b>Conducting empirical / survey /conceptual/ analytical/descriptive study:</b> Presentation will include background, literature, methodology/theoretical framework, findings and discussion	12	Student learns to carry out a scholarly study and present findings in as expected in an academic environment
4	<b>Writing research proposal and paper:</b> A term paper similar to a journal article will be required. This may be prepared taking a new topic or from the seminars already given in the course.	10	Student gains familiarity with academic writing skills.
	<b>Total Lecture Hours</b>	42
