## Annexure – I

### **TECHNICAL SPECIFICATIONS FOR SUPPLY & INSTALLATION OF FIXED BED CATALYSIS**

#### **Section 1: General specification**

- A bench-top unit comprising of a packed bed reactor columns, feed pump, optical absorbance sensor/photometer and a flow injection analysis (FIA) system mounted on a suitable base with electrical console.
- The base of the unit should be constructed with a suitable and durable material to ensure good rigidity and strength.
- The unit should be supplied as a standard unit with two reactor columns for fixed bed chemical catalysis.
- A provision must be available to add a third column to the system for biological (enzymatic) fixed bed catalysis.
- The unit must be able to employ a standard catalytic reaction (e.g., sugar inversion reaction) to study the performance of packed-bed chemical and biological catalytic reactors.
- An optical absorbance sensor/photometer must be provided to determine the degree of conversion.
- Automated assay using flow injection analysis (FIA) system must be provided.
- The FIA pump should be adjustable to give flow rates of 2.0 ml/min or higher.
- A microprocessor based heated water circulator arrangement must be provided to the column jackets that enables automatic control of reaction temperature to a set point value in order to study the effect of temperature.
- A variable-speed peristaltic feed pump must be provided to adjust the flow rate through the reactors.
- Feed flow rate range: 0-50 ml/min or higher is to be maintained.
- Valves are to be provided to change the feed and product flow from one packed column to the other.
- Suitable sized storage tanks for reactants and products should be provided.
- All electrical circuits are to be fitted with appropriate protection devices.
- The console must have digital display meters to show the temperature of water supplied to the column jackets, and the optical sensor reading (a measurement of product concentration).
- Data acquisition system supported by suitable analysis software along with an I/O port for connection to a Windows based PC should be provided.
- A comprehensive instruction manual with details installation and operating procedures is required to be provided.

#### **Power requirement:**

220-240 V; Single Phase; 50 Hz
