02. Background of e-Procurement at CIL continued..

1. Award of work through finalization of tenders is one of the most important business activities of MCL as most of the work is executed through contractual mode. This involves dealing with considerable amount of public money.
2. While evaluating bids in each tender, it is imperative to follow extant procurement guidelines, draw decision making foundations from precedence and apply complete fairness for equal opportunity of business to prospective bidders.
3. The other part i.e., technical bid evaluation, by the overall system is limited to online collection of technical documents and thereafter undergoing manual evaluation.
4. Though transparency and speed is achieved in the process of tender participation, there exists scope to improve the evaluation process and make final recommendations.

03. Broad Objectives

1. Development of a software module which will be able to evaluate tenders and provide recommendations based on extant procurement guidelines.
2. The software module shall be able to refer to precedence/legacy in work awarded earlier and basis of extra-ordinary decisions taken if any. It should be able to tag and perform analogous analysis and summarize the same.
3. The module shall have the flexibility of being used either as a web extension over e-procurement of Coal India Limited and GeM portal or as a standalone software package; wherein, documents from these portals may be uploaded and recommendations can be made automatically
4. The software module shall reasonably eliminate manual engagement in the tender evaluation process as far as possible.
5. Software shall be up-gradable to any revision in procurement guidelines or any other policy guidelines that affects the extant evaluation process/criteria.
6. Development of manpower for upkeep of the system including handling of minor maintenance of the developed system
