PRESS RELEASE

IIT (ISM) faculty members carry out awareness about relevance of Science and Technology using 3D Technology among the students of Middle School, Benagaria

A team of faculty members and research scholars of IIT (ISM) under the leadership of Prof Rashmi Singh of Department of Management Studies and Industrial Engineering today carried out awareness about Relevance of Science and Technology among around 400 students of Middle School, Benagaria in Nirsa Block of Dhanbad during which they used 3 D techniques.

“The awareness workshop which began at around 10 a.m. this morning and concluded at around 2 p.m. was part of Department of Science & Technology sponsored project titled, Motivate School Students & Teachers Concerning the Relevance of Science & Technology Through Innovation Communication Techniques.

“Using live models of 3 D Shapes we made the students aware with solid objects that have length, breadth and width” said Prof Singh who is also the Principal investigator of the project and added that they dealt with 3 D shapes like sphere, rectangle, prism, cylinder etc..

Nildri Das, Associate Professor of Department of Management Studies and Industrial Engineering of IIT (ISM) who was also present during the occasion said, “Learning 3 D shapes can help to aid artistic development among children” and added that this can help to enhance their creativity and innovative thought process”

“The understanding of the 3 D shapes can foster better visualization and increase multiple perceptions, which plays crucial role in child development” further said Das and added that experience during the workshop was quite good as students of this over 100 years old school took keen interest in their lessons.
