## **PRESS RELEASE**

### **Department Research Day celebrated at Department of Chemical Engineering of IIT (ISM)**

With the aim to promote more active and vibrant research environment, Department of Chemical Engineering, IIT(ISM) Dhanbad observed the inaugural edition of the “Department Research Day” recently at the department premises.

After the welcome address by Prof. Aditya Kumar, Head of the Department, highlighting the motivation for such dedicated research day, Prof. JK Pattanayak, Director, IIT(ISM) Dhanbad, who is also the Patron program emphasized on the need for such a program in every department.

Prof Pattanayak during his address as chief guest also motivated the students of the department to seek higher pinnacles in their research activities and advised them not getting afraid of the associated challenges.

Prof. Sagar Pal, Dean (R&D) of the institute also praised the department for all its achievements. Meanwhile, the motivating words regarding research and innovation proved truly inspiring for the research scholars as well as the budding researchers of the department.

The PhD scholars and MTech students as well as the postdoctoral researchers of the department showcased their research journey and salient outcomes to the research fraternity of the department.

Altogether, fifteen speakers shared the details about their research progress through oral presentation during the program. This apart, there were also eight poster presentations during the program to showcase the various research trajectories that MTech and PhD scholars of the department have been following. The program concluded after the prize distribution with hope for it becoming an annual event of the department, with increased participation and enthusiasm.
