Hands-on CPR Training Organised at IIT (ISM) Dhanbad

The Office of the Dean (Research & Development), IIT (ISM) Dhanbad, today organised an intensive **hands-on Cardiopulmonary Resuscitation (CPR) training** at the PENMAN Auditorium of the institute. The programme aimed at equipping participants with life-saving skills essential during cardiac emergencies.

The training was conducted by **Dr. Satabdi Kalyan Mukherjee**, Head of Emergency Services at Vivekananda Hospital, Durgapur, along with her expert medical team. The session was chaired by **Prof. Sagar Pal**, Dean (R&D), IIT (ISM), in the presence of **Dr. Tanushree Banerjee**, CMO In-charge, IIT (ISM), and **Prof. S. R. Samadder**, Associate Dean (R&D).

In an interactive format, participants were made aware of the **critical importance of timely CPR**, the **correct techniques to perform it**, and the **vital role it plays in saving lives**. The session included live demonstrations followed by hands-on practice, where attendees learned and practised CPR techniques on medical dummies under expert supervision.

Speaking on the occasion, Prof. Sagar Pal emphasised the institute's commitment to promoting health awareness and emergency preparedness among its community. "Skills like CPR empower individuals to act swiftly and effectively in life-threatening situations," he said.

Dr. Satabdi Kalyan Mukherjee highlighted that CPR is a vital skill not just for healthcare professionals but for every individual. "In emergencies, the first few minutes are crucial. Properly administered CPR can make the difference between life and death," she noted.

The event drew active participation from faculty, staff, and students, reflecting the institute's proactive approach towards creating a safer and more responsive campus environment.
